The background of the image is a dark, marbled paper with a complex, swirling pattern of black, grey, and white. The pattern resembles a topographical map or a close-up of a textured surface. In the center, there is a white rectangular label with a thin black border. The text on the label is printed in a serif font.

PUBLICATION
APPROVED BY
THE BOARD OF CONTROL.

State of Connecticut.

William H. Corbin,
Tax Commissioner.

TAX COMMISSIONER'S OFFICE,
HARTFORD, December 30, 1908.

Section 2364 of the General Statutes provides for the publication, every four years, of definite information relative to the indebtedness and expenditures of the counties, cities, boroughs, and towns of the State. An amendment to said section by the Legislature of 1907, changed the duty of securing this information and compiling the same from the Comptroller to the Tax Commissioner. In accordance therefore with such requirements, the following statement of municipal debt and expenditure of the different municipalities of the State, as made by their respective treasurers, is hereby submitted.

RETURNS

To secure definite statements of the indebtedness and detailed information relative to receipts and expenditures and other necessary data, a letter and a report blank were sent to the treasurer of every county, city, borough, and town, which are given herewith:

HARTFORD, SEPT. 1, 1908.

MY DEAR SIR:

Enclosed herewith find blank to be used in making the quadrennial return of municipal debt and expenditure for your town, as required by Sections 2364 and 2365 of the General Statutes, as amended.

The questions given on the blank have been selected for a particular purpose after considerable deliberation. In order, therefore, that the printed report may be uniform in the answers given, and in the information furnished by each town, it is particularly requested that every question be answered.

It will occur to you, of course, that the two totals under question No. 47 should be equal, and if this result is shown, it will be evident that the figures given in the receipt and expenditure columns are correct.

Will you kindly have the report returned in complete form by October 12, 1908, as requested, so that the work of compilation may begin promptly?

Yours very truly,

WM. H. CORBIN,
Tax Commissioner.

State of Connecticut
QUADRENNIAL RETURN
 OF
MUNICIPAL DEBT AND EXPENDITURE.

County.....
 Town.....
 City.....
 Borough.....

To be returned on or before October 12, 1908: Sections 2364 and 2365 of the General Statutes, as amended.

To the Tax Commissioner:

Sir: The following is a true statement of the indebtedness of the County Town City Borough of.....on the first day of October, 1908, as required by Section 2364 of the General Statutes, as amended.

1. Funded indebtedness:

Date incurred.	Form.	For what purpose.	Date of maturity.	Interest rate.	Amount.
.....	\$.....
.....	\$.....
.....	\$.....

 this day of A. D.
 1908,

Personally appeared the above-named
 and made oath to the truth and correctness
 of the above statement, before me.

.....

PLAN OF THE REPORT

The plan of this report is to give the information required by the statutes in a manner which may be most useful and most accessible for comparison.

Wherever possible, the arrangement is in the order of estimated population, so that municipalities of similar size will be together.

The table, arranged in order of the percentage of net indebtedness to the grand list, groups together the towns with a similar degree of indebtedness. While those that head the list with the largest percentages appear to be in a serious condition in this respect, the fact is that in all but a few instances, the indebtedness has been incurred on account of obligations assumed in the construction of railroads, and the efforts of those towns to reduce the indebtedness and meet their obligations in an honorable manner is very praiseworthy. It is probable that within a few years, such towns will have brought their indebtedness down to a basis which will be similar to that of other municipalities which aim to conform to the well-recognized limitation of indebtedness to grand list, as required by safe investors.

DATE OF RETURN

The statutes provide that the information required relative to indebtedness and the receipts and expenditures of the different municipalities shall be as of the first day of October, and for the year next preceding. Inasmuch as the fiscal years of many cities close on dates which include nearly every month of the calendar year, it has been necessary for the treasurers of such cities to estimate the figures given as of October 1st to conform with the statutory requirements.

It is undoubtedly true that if such returns are approximately accurate, it enables a more satisfactory comparison to be made between the different municipalities, inasmuch as they are all on the same basis. Such a requirement, however, caused considerable trouble to the treasurers of several of the cities in making returns in accordance with the statutory provisions.

MUNICIPAL ACCOUNTING

The great difficulty experienced in securing the information requested on the report blank, which necessitated returning the reports for corrections and proper answers, demonstrated conclu-

sively the complete absence in a large number of the towns of any system of separation of accounts to show the purposes for which the indebtedness was incurred, or the yearly payments were made, or even of any definite method of bookkeeping, such as would be necessary to any well-conducted business.

The prevailing custom seems to be for the first selectman to draw an order on the treasurer without giving him any information whatever as to the purpose for which the order is given. In most of the towns, therefore, it is impossible for the treasurer to give an analysis of the expenditures from information in his office. The person cognizant of the matter is the first selectman, who incurred the obligation and drew the order on the treasurer for its payment.

In many towns there is apparent evidence of lax and unbusinesslike methods in the conduct of public affairs.

It is obvious that some simple and uniform method of municipal accounting throughout the State is very necessary; such as is used ordinarily in any successful business. This should include a subdivision of expenditures with a proper charge against any appropriation that has been made by the town for a specific purpose. In addition all orders of selectmen should be drawn with sufficient information to indicate the head under which the expenditure should be placed, such as highways, bridges, paupers, schools, salaries, public buildings, or general expenses.

A businesslike method of accounting in every town would give clearer information to the taxpayers, would undoubtedly result in actual saving and economy, and would enable a proper audit to be made which in many towns is sadly lacking.

FIRE DISTRICTS

While the statute requiring the quadrennial return of municipal debt and expenditure applies to boroughs, it does not apply to fire districts, and similar associations which are authorized by a special act of the legislature to incur indebtedness and raise money by taxation.

So that such a report will show as completely as possible the total indebtedness of all of the municipalities, and similar units of government in the State, it would seem that fire districts and other incorporated associations should be included in the requirements of the statute.

PURPOSES OF INDEBTEDNESS

The treasurers of a large number of the towns and of several of the smaller cities were unable to give complete information as to the various purposes for which the indebtedness of the municipality was created. It has been necessary, therefore, in several instances to include a large portion of the indebtedness under the head of "general expenses." This would indicate that the same had been incurred by a yearly excess of expenditures over receipts, but it is probably true that in many cases there have been special purposes for which a large proportion of the indebtedness was created; no record of which, however, is available in the treasurer's office.

On the other hand the very large amount of indebtedness incurred for "general expenses" is a definite indication that many towns have allowed their expenditures to exceed their income. This has been caused in some towns by extravagance, but in most instances it has been caused by failure to keep the grand list up to the statutory requirements. The tax rate, however, has been increased on the low valuation until it reached almost the limit. Not daring to increase the tax rate further, the town then commenced the indefensible habit of yearly running in debt for the payment of current expenses.

All this could have been obviated by a frequent revision of the grand list by revaluation on the statutory basis of all the property by personal inspection, thus securing a reasonable and sufficient income from a moderately low tax rate.

COMPARISON.

The total indebtedness of all the counties, cities, boroughs and towns of the State is \$38,463,704.91. This is an increase of \$5,943,244.30, or 18%, since the report of 1904.

The total indebtedness of the counties is \$250,445.91, a decrease of \$94,054.09 since the last report.

The total indebtedness of all the cities, boroughs and towns in the State is \$38,213,259.00. This is an increase of \$6,037,298.39 since 1904.

The total indebtedness of all the school districts in towns not under the consolidated system, as reported, is \$2,351,162.73.

Two counties show an increase, four a decrease in indebtedness, and two show no change, having no debt either year.

Five cities show an increase, and five a decrease in indebtedness during that period, not including those in which town and city governments are consolidated.

Ten boroughs show an increase, ten a decrease in indebtedness and three show no change, having no debt in either year, not including Naugatuck, the town and borough governments of which are consolidated, nor Groton, incorporated in 1903.

One hundred and four towns show an increase, fifty-nine a decrease in indebtedness during that interval, and five show no change.

The following municipalities reported no indebtedness whatever:

Counties.	Boroughs.	Towns.
New Haven,	Fair Haven East,	Thompson,
Windham,	Branford,	Kent.
Litchfield,	Guilford,	
Middlesex,	Colchester,	
	Newtown.	

There is an increase of \$2,220,325.29 in the amount raised by taxation during the past year as compared with 1904. There is an increase of \$306,438.64 in the amount expended for interest on indebtedness, as compared with the previous published statement.

There have been the following increases in the amounts received by the towns from the State: for roads, \$119,929.36; and from the tax on the capital stock of banks and other investment companies, \$77,786.26.

The increases in the amounts expended for different purposes during the past year as compared with the year 1904 are: for paupers, \$149,372.36; salaries, \$185,092.43; schools, \$1,211,993.95; police, \$162,204.13; and fire departments, \$333,828.58.

The percentage of net indebtedness of the entire State to the grand list as returned by the towns is 4.73%.

The percentage of total expenditures for the past year of the entire State to the grand list as returned by the towns is 2.5%.

The total amount received this past year from local taxation is equal to a tax of 15.09 mills on the grand list as returned by the towns.

The per capita net indebtedness of all municipalities is \$32.35.

The per capita local tax of all municipalities is \$10.32.

The per capita expenditure of all municipalities is \$20.46.

TABLES.

The arrangement of the order of the tabulated statistics gives the counties first, followed by the indebtedness, receipts and expenditures of the cities, boroughs, and towns, comparative tables of percentage and per capita details, and at the end a comparative statement since 1880, using all information available for that purpose.

The tables with their numbers and details are as follows:

Table No. 1. Details of the gross indebtedness, sinking fund, net indebtedness, receipts and expenditures of the different towns, arranged by counties, with totals.

Table No. 2. Summary of the municipal statistics by counties.

Table No. 3. Detailed statement of indebtedness of counties, cities, boroughs and towns, giving funded and floating indebtedness, sinking fund, net indebtedness, date of maturity and interest rates, and the principal purposes for which the debt was incurred; cities, boroughs and towns arranged in order of estimated population.

Table No. 4. Summary of the indebtedness of counties, cities, boroughs and towns.

Table No. 5. Receipts and expenditures of counties, cities, boroughs and towns for the year ended September 30, 1908; cities, boroughs and towns, arranged in order of estimated population.

Table No. 6. Summary of receipts and expenditures of counties, cities, boroughs and towns.

Table No. 7. Estimated population, percentage of net indebtedness, grand list, gross indebtedness, sinking fund, net indebtedness and per capita indebtedness of cities, boroughs and towns, arranged in order of percentage of net indebtedness to grand list.

Table No. 8. Estimated population, valuation, assessed valuation per capita, tax rate per \$1,000, total current expenses, per capita current expenses, per capita tax and percentage of total current expenses to valuation of cities, boroughs and towns, arranged in order of estimated population.

Table No. 9. Charts showing relative increase in grand list, indebtedness, amount raised by taxation, expenditures for roads, schools, and interest, compared with increase in population from 1880 to 1908.

Table No. 10. Comparative abstract of certain statistics since 1880.

CHART COMPARISON.

The charts on pages 112 and 113 illustrate in an impressive manner the relative increase from 1880 to 1908 of the grand list, indebtedness, the amount raised by taxation, and the expenditures for roads, schools, interest, and paupers, as compared with the increase in the population of the State during the same period of time.

It is notable that the relative increase of the indebtedness and the amount raised by taxation is about the same as the increase in the State grand list, as returned by the towns.

The increase of expenditures for roads and schools is very marked. The comparatively small increase for interest payments, providing the data received in the different years is correct, possibly may be explained by the fact that the interest rates have declined materially during the twenty-eight years, so that it is possible now for a municipality with the expenditures of the same amount for interest to carry at the prevailing rate of interest a much larger indebtedness than formerly.

Information of previous years is not available to show the relative increase in the amount of the sinking fund.

Respectfully submitted,

A handwritten signature in cursive script, reading "Wm. H. Borbin". The signature is written in dark ink and is positioned above the title "Tax Commissioner."

Tax Commissioner.
